Extend Low-Rise Lift Reach with this Arm Kit

Finding difficult-to-reach lifting points has never been easier! Increase your [low-rise lifting capabilities](#) with the LR-4A optional Arm Kit. Designed to fit BendPak low-rise lift models LR10000, LR-60 and LR-60P, these specialty arm adapters extend the pad reach of each ramp. The LR-4A arm attaches easily to the low-rise lift ramp so you can reach contact points that might be closer together on your frame. The easy-slide design allows the LR-4A to move along the ramp rail giving you the power to position the lifting arm anywhere under your vehicle.

Features

- Fits models LR10000, LR-60 and LR-60P
- Increases pad width of the ramps
- Easy to install and use
